

CHUBB®

WEEK-8 ASSIGNMENT

-Riddhima Bhanja
Kalinga Institute of Industrial Technology
Bhubaneswar(Java Track)

INDEX

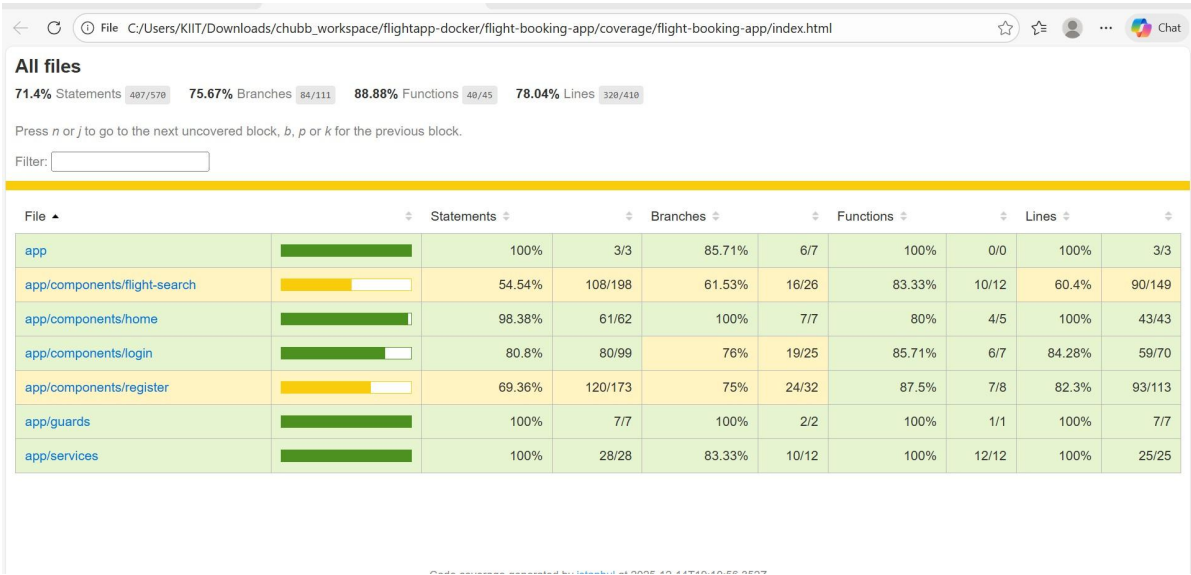

(flight app with angular)

S. No.	Main Category	Details Included
1	Code Coverage Report	• All Files • Code Coverage Breakdown
2	Test Run (UI)	• UI Test Execution Results
3	Home Page	• Home Page UI & Functional Testing
4	Register Page (Create Account)	• User Registration Flow • Account Creation Validation
5	Login Page	• User Login Functionality
6	Search Flights Page	• Flight Search UI • Search Functionality
7	Login for Searching Flights	• Authentication Required for Flight Search
8	Validation Errors	• Search Flights Validation Errors • Login Validation Errors • Email Validation Errors • Registration Page Validation Errors
9	Build Success	• Successful Build Confirmation
10	Clean Flight Search Page	• No Pre-filled Data • UI Reset Validation
11	Clean Login Page	• Empty Fields Validation
12	Password Mismatch Error	• Incorrect Password Handling
13	MongoDB Data	• Database Records Verification
14	MySQL Workbench	• Relational Database Validation
15	Password Eligibility Cases	• Length Check • Strength Rules • Format Validation
16	User Already Exists Case	• Duplicate User Registration Handling
17	Postman Reports	• API Testing Reports • Request-Response Validation

ER DIAGRAM

1. SonarQUBE Code Coverage

2. SonarQube Issues

Before fixing:

The screenshot shows the SonarQube interface for the 'docker' project. The left sidebar contains navigation links: Overview, Main Branch, Pull Requests, and Branches. The main content area is titled 'Riddhima Bhanja > docker > main'. It displays a list of filters for 'Software quality' (Security: 1, Reliability: 4, Maintainability: 29) and 'Severity' (Blocker: 1, High: 5, Medium: 15, Low: 11, Info: 0). The 'Code attribute' and 'Type' sections are also visible. The right panel shows a list of issues for bulk actions, including 'Remove this field injection and use constructor injection instead.', 'Inject this field value directly into "customRouteLocator", the only method that uses it.', and 'Define a constant instead of duplicating this literal "lb://flight-service" 4 times.'.

Filter	Count
Security	1
Reliability	4
Maintainability	29

Severity	Count
Blocker	1
High	5
Medium	15
Low	11
Info	0

The screenshot shows the SonarQube Summary page for the 'docker' project. The left sidebar contains navigation links: Overview, Main Branch, Pull Requests, and Branches. The main content area is titled 'Riddhima Bhanja > docker > main'. It displays a summary of the project's quality metrics: Security (1 Open Issues, E), Reliability (4 Open Issues, C), Maintainability (29 Open Issues, A), Accepted Issues (0), Coverage (0.7%, A), and Security Hotspots (0). The 'Coverage' section includes a message: 'A few extra steps are needed for SonarQube Cloud to analyze your code coverage. Set up coverage analysis'.

Metric	Value	Quality Gate
Security	1 Open Issues	E
Reliability	4 Open Issues	C
Maintainability	29 Open Issues	A
Accepted Issues	0	
Coverage	0.7%	A
Security Hotspots	0	

After fixing:

This screenshot shows the SonarCloud project issues page for the project 'FlightApp_Docker-Assi...'. The URL is https://sonarcloud.io/project/issues?issueStatuses=OPEN%2CCONFIRMED&id=riddhimaBhanja_FlightApp_Docker-Assignment7-. The page displays a 'Summary' tab with filters for 'Software quality' (Security, Reliability, Maintainability) and 'Severity' (Blocker, High, Medium, Low, Info). The main content area shows 'No Issues. Hooray!' with 0 issues and 0 effort. The footer includes copyright information for SonarSource Sàrl.

This screenshot shows the SonarCloud project summary page for the project 'FlightApp_Docker-Assi...'. The URL is https://sonarcloud.io/summary/overall?id=riddhimaBhanja_FlightApp_Docker-Assignment7-&branch=main. The page displays a 'Summary' tab with overall quality metrics. The metrics are as follows:

Metric	Value	Status
Security	0 Open Issues	A
Reliability	0 Open Issues	A
Maintainability	0 Open Issues	A
Accepted Issues	0	B
Coverage	A few extra steps are needed for SonarQube Cloud to analyze your code coverage. Set up coverage analysis	
Duplications	0.8% No conditions set on 2.7k Lines	
Security Hotspots	0	

The footer includes copyright information for SonarSource Sàrl.

EUREKA SERVER LOGS

The screenshot shows the Docker Desktop interface with the 'eureka-server' container selected. The container is running on port 8761. The logs tab is active, displaying a series of INFO and WARN messages. The logs indicate that the container is running the 'eureka-server' image and is part of a cluster. The logs also show the current renewal threshold is 0 and the replica size seems to be empty. The container is running on a host with 19.00 GB of disk space used.

```

API GATEWAY

The screenshot shows the Docker Desktop interface with the 'api-gateway' container selected. The container is running on port 8080. The logs tab is active, displaying a series of DEBUG messages. The logs indicate that the container is running the 'api-gateway' image and is part of a cluster. The logs also show the current renewal threshold is 0 and the replica size seems to be empty. The container is running on a host with 19.00 GB of disk space used.

BOOKING SERVICE LOGS

The screenshot displays the Docker Desktop interface. On the left, the 'Containers' sidebar lists various components like Ask Gordon, Images, Volumes, Kubernetes, Builds, Models, MCP Toolkit, Docker Hub, Docker Scout, and Extensions. The main area shows the 'Containers' tab for a container named 'booking-service'. The container details indicate it is running on a Linux VM (bbo0290db948) with ID 8082.8082. The 'Logs' tab is active, showing a split view of logs. The left pane displays the container's output, including Spring Boot startup logs and a warning about BeanPostProcessor configuration. The right pane shows the host's output, including the Java command to start the application and the same warning. The status bar at the bottom indicates the host is running on a Mac (RAM 7.11 GB, CPU 5.22%, Disk 19.00 GB used).

FLIGHT SERVICE LOGS

The screenshot shows the Docker Desktop interface. On the left is a sidebar with navigation options: Ask Gordon BETA, Containers (selected), Images, Volumes, Kubernetes, Builds, Models, MCP Toolkit BETA, Docker Hub, Docker Scout, and Extensions. The main panel displays the 'flight-service' container, which is running. The container's status is 'Running (11 hours ago)'. The logs show the application starting successfully with Spring Boot v3.2.0. The logs include the following text:

```

2025-12-07T18:22:13.213Z INFO 1 --- [flight-service] [PID 1 (/app/app.jar started by root in /app)]

SEND EMAIL

GET BY ID

The screenshot shows the Postman interface for a workspace named 'riddhima bhanja's Workspace'. The left sidebar lists collections, environments, history, and flows. The 'notification service(docker)' collection is expanded, showing a list of endpoints. The 'GET get notification by ID' endpoint is selected. The main panel shows the request details: a GET request to 'http://localhost:8083/api/notifications/6935a9a61ee8f9036919f375'. The response is a 200 OK status with a response time of 85 ms and a body size of 2.51 KB. The response body is a JSON object containing a message, status, error message, created at, and sent at timestamp.

```
GET http://localhost:8083/api/notifications/6935a9a61ee8f9036919f375
```

Query Params

Key	Value	Description
Key	Value	Description

Body

```
{ "message": "Access 24/7 customer support</li>\nexploring our flight options and book your next journey today!</p>\n\n<br>\n<strong>Flight Booking Team</strong></p>\n\n<div\nclass=\"footer\">\n<p>&copy; 2025 Flight Booking Service. ```

BOOKING CONFIRMATION EMAIL

The screenshot shows the Postman interface for a workspace named 'riddhima bhanja's Workspace'. The left sidebar lists collections, environments, history, and flows. The 'notification service(docker)' collection is expanded, showing a list of endpoints. The 'POST booking confirm' endpoint is selected. The main panel shows the request details: a POST request to 'http://localhost:8083/api/notifications/send'. The response is a 201 Created status with a response time of 6.01 s and a body size of 288 B. The response body is a JSON object containing a notification ID, customer ID, customer email, status, message, and timestamp.

```
POST http://localhost:8083/api/notifications/send
```

Body

```
{ "templateName": "booking-confirmation", "subject": "Flight Booking Confirmation - PNR12345678", "templateData": { "customerName": "riddhima bhanja", "pnr": "PNR12345678", "flightNumber": "AI101", "notificationId": "6935c67f55627f03b8b65197", "customerId": "CUST123", "customerEmail": "riddhimabhanja2003@gmail.com", "status": "SENT", "message": "Email sent successfully", "timestamp": "2025-12-07T18:25:07.687277843" }
```
